Dr. Khatarina Kluge,

At the request of the Head of the SAG International Affairs Department, Mr. Hernán Valenzuela A., please find attached SAG letter No. 399/2025, from the Head of the Livestock Protection Division, in relation to the outbreak of foot-and-mouth disease that occurred in Germany in the state of Brandenburg, an event that began on January 9, 2025, according to notification from the World Organization for Animal Health (WHO), reference: BB MKS 01/25 IN.

In this regard, our Service (SAG) would like to confirm that no shipment of products of species susceptible to foot-and-mouth disease, which consider production dates after December 12, 2024, has been certified for export to Chile from the containment zone, and if so, we kindly request the recall of all those batches and shipments destined to Chile.

Waiting for your response, best regards.

Didier Wauters
